

FABER-CASTELL

— since 1761 —

EXPORT CATALOGUE 2017 / 2018

The international group of companies

Faber-Castell employs some 8000 people around the globe, and has its own production sites in 9 countries as well as sales companies in 22 countries. The extensive supply chain for all sites producing wood-cased pens using wood from sustainable forestry is indicative of the leading position the Faber-Castell Group holds in environmental matters.

Overview of Faber-Castell's production plants and sales companies around the world

■ Production plants ■ Sales organisations

Climate protection starts with the product – global CO₂ neutrality is unique in the writing instrument industry

TÜV Rheinland has certified that the company is CO₂ neutral worldwide. The company's eco-forests in Brazil and Columbia actively contribute to protecting the environment. Instead of touting individual "green products", Faber-Castell minimises its environmental footprint throughout the entire life cycle of its product range. Faber-Castell products are green because they are long-lasting, often refillable as well as pollutant-free, and come from CO₂-neutral production. The use of bio and recycled plastics also improves the "green footprint" of Faber-Castell.
